The Tennessee Department of Safety and Homeland Security has been notified by your ignition interlock provider that you have successfully completed the ignition interlock program. You are eligible to have the ignition interlock restriction removed from your license and the ignition interlock device removed from your vehicle.

It is recommended that you complete any reinstatement requirements and visit a Driver Service Center to be issued a license with the ignition interlock restriction removed **prior to removal of the ignition interlock device**. Doing so will ensure that you are in compliance with any applicable license restriction laws.

You may check for any additional reinstatement and licensing requirements at <https://dl.safety.tn.gov/> or by calling (866) 903-7357.

Present your re-issued license with the interlock restriction removed to your ignition interlock provider for device removal.
